

Bluebird Feeder Project

Jay's mom loves birds. She has several bird feeders in the yard. But she has never observed bluebirds at them. Three feeders have sunflower seeds. A tube feeder offers niger seed. The tray feeder offers a mixed blend of dry seeds.

Jay wants to get the bluebirds to come to a feeder for his mom.

Give Jay some advice on how to get bluebirds to come to a feeder. Research Required!

Describe: the type of feeder, the particular bird food & the optimal location that will have the best chances of attracting bluebirds. Explain your choices.	re
